

UNSEEN | UNMASKED

EXHIBITION PROGRAMME 2026

A series of 9 photographic portraits revealing the ubiquity of the unseen. Photographer The1Harris explores what it feels like to be neurodivergent, and how perception and stigmatisation by others so heavily shape & contort our senses

Unseen | Unmasked is a powerful photographic exhibition by Harris (The1Harris), sharing experiences of Neurodivergence, including his own, in order to unmask identity and perception. Through these portraits, the exhibition reveals what is usually hidden, challenging assumptions about identity and perception. It forms part of You & Us, a touring triptych by Cathy Waller Company examining themes of invisibility through photography, dance and film.

Made possible with public funding from Arts Council England and in partnership with Disability Arts Online.
